Babysitting Paediatric First Aid Course

Due to popular demand we have designed this short 3hr course to provide basic information for people who provide babysitting services. We have found that parents find it very reassuring to know that their babysitter has received First Aid training. Topics covered on the course include:

- **Management of an Unconscious Baby or Child**
 - **Resuscitation of Babies and Children**
 - **Choking**
 - **Seizures**

We will also cover any other topics required by the student.

On successful completion of the course each candidate will receive a certificate of attendance stating the topics they have been trained in. Due to the length of course we cannot issue a formal qualification, if this is required it would be advisable to attend the full 6 or 12hr course.

The cost of the course is £200, this will allow for up to 10 students, additional students are charged at £20 per student. Course fees are payable direct to the tutor.

For further information or to make a booking please contact our office at any time.
